

## **Alfred Nobel University Laboratories**

To ensure effectiveness in science and research, the University constantly establishes a stimulating environment for students and teachers.

This was a weighty argument for the Ministry of Education and Science of Ukraine and All-Ukrainian community “Znannia” and in November, 2010 at the exhibition “Education and Science” held in Kiev, the University received **the Gold Medal in the category “Development of logistics”**.

**The Department of Enterprise, Trade and Exchange Activity** has 6 labs at students’ disposal to ensure high quality of practical classes:

- Lab of chemistry, microbiology and biochemistry;
- Lab of chemical, physical and mechanical testing of non-food goods;
- Research lab of alimentary products;
- Lab of alimentary products;
- General research lab of alimentary products and sensory analysis;
- Physics lab.

**The Department of Law** has a laboratory of criminal investigation equipped with computer-based systems for producing identikit images.

**Philology students** are working in a language room named after Prof. Nina Petrenko equipped with modern linguaphone equipment.

The lab on tourism, local studies, excursions running the “Overia Tourism” software, gives an opportunity to receive a corresponding certificate upon completion of studies.

All labs available have successful development of expertise in our students as their target aim.
